

IT SIMPLY WORKS.

AIR-NEX 9480

// Be connected with the new AC Service Generation by BRAIN BEE

R1234yf

AIR-NEX 9480 FOR R-1234YF IS THE FLAGSHIP OF THE AIR-NEX RANGE. EXTREMELY SAFE, AS CERTIFIED BY EGEA, THE VOLUNTARY CERTIFICATION THAT MEETS THE STRINGENT REQUIREMENTS OF THE EMC, LVP AND PED REGULATIONS, DOES NOT RENOUNCE TO OFFER ITS USERS EXTREME PRACTICALITY AND FRIENDLY USE.

The ergonomic design of the Airr-nex generatiois has been developed in cooperation with workshops, projected after analyzing carefully the daily work in the workshop. With AIR-NEX 9480 it is possible to fully entrust the recharge service to the automated processes of the station, sure of an impeccable result and being able to devote to other activities in the meantime. The profitability of the top-up service is thus ensured.

The integrated Wifi connection is the constant element of the entire line, which allows, in the case of AIR-NEX 9480 to fully exploit all the innovative features. Indeed, like the model for R-134a, also AIR-NEX 9480 offers the integration with special APPs, which allow an absolutely innovative and practical management, as well as the integration with the BRAIN BEE diagnostic tool that enhance its field of action.

Automatic updates and printing via AIR-PRINT.

All AIR-NEX stations are equipped with a WIFI connection via Bluetooth.

This allows access to functions additional such as:

- + AUTOMATIC UPDATE (software and database)
- + REMOTE CONTROL
- + REMOTE SERVICE
- + REPORT WIFI PRINTER
- + ASA NETWORK interface
- + APPs (iOS and Android)

// OUR INNOVATIVE TECHNOLOGIES AT A GLANCE

AIR PURGE SYSTEM:

Automatic monitoring of non-condensing gas: special software ensures that the purging of non-condensing gas is only recommended when actually necessary. This way, you can decide for yourself whether you wish to carry out this procedure, and always stay in complete control of the station.

SUPER CHARGE:

In all ambient conditions, the station is 100 % guaranteed to charge the system with the programmed quantity, irrespective of the temperature of the environment or engine – always at a constant speed and with clear energy savings.

ECO LOCK®:

ECO LOCK® is a patented feature that enables you to reduce the quantities of gas, ensuring your safety and greatly helping to protect the environment. The A/C station separates the air that normally gets into the refrigerant in the tank when it is connected to the vehicle. It then tests the vehicle connections for leaks before the end of the air conditioning service.

N-LEAK TEST:

With the optional Nitrogen Kit, you can perform a leak test on the air conditioning system under pressure using nitrogen forming gas. The station software is prepared for this option as standard.

LONG LIFE PUMP®:

The special LONG LIFE PUMP® feature extends the average life of the pump oil used in the station to up to 1,000 hours.

OIL CLEAN:

The exclusive Oil Clean feature ensures that less refrigerant is needed to eliminate the old oil. What's more, every day, from the first service to the last, exactly the right amount of oil is put in.

HPV:

The HPV (High Precision Vacuum) reaches the required level of vacuum for the drying effect more quickly, saving energy.

Key features:

- + 7" high visibility Touchscreen display
- + ONETOUCH liftdoor system
- + Wifi
- + ASA NETWORK interface
- + AIR-PRINT software
- + Multipass
- + UV Test
- + Flushing⁽¹⁾
- + Hybrid function⁽¹⁾
- + N-LEAK TEST⁽¹⁾
- + BRAIN BEE Scantools integrated⁽³⁾
- + APP (iOS and Android) integrated
- + Oil Care system
- + Autom. purging of non-condensing gas
- + Made by MAHLE

Technical data:

- + Dimensions: 700 x 750 x 1100 mm
- + Weight 85 kg
- + Reservoir capacity: 20 l
- + On board printer: optional
- + Gas identifier: optional

⁽¹⁾Optional kit required
